ABOUT ME

I am defined by a deeply pragmatic approach, focused on solving problems efficiency. I take full ownership of each project, treating it as my own and actively engaging in every phase of the lifecycle to ensure the final product exceeds client expectations.

I stand out for my assertive and empathetic communication, with a proven ability to mediate in high-pressure situations and foster a collaborative, motivating work environment. I embrace my mistakes with maturity as part of continuous learning, and I integrate emerging technologies, such as AI, to streamline processes and deliver reliable, robust, top-quality software.

WORK EXPERIENCE

TMC España SL - Spain, Valencia

Android Developer

[01/04/2025 - 01/06/2026]

Focused on building a new version of a mobile banking application, collaborating with cross-functional teams across multiple companies to design, plan, develop, and implement features and enhancements on existing architectures.

Successfully managed high-pressure situations, consistently meeting delivery deadlines even during peak workloads.

Gained hands-on experience publishing apps to production via the Google Play Console and generating app bundles to test across multiple environments.

Mercadona - Spain, Valencia

Android Developer

[01/04/2022 - 01/04/2025]

Managed the full software development lifecycle (SDLC), from initial design and coding to comprehensive testing.

Co-led and executed the complete re-engineering and digitalization of the company's warehouse operations, integrating modern tech stacks and architectural patterns.

Actively trained and mentored new team members, while coordinating projects directly with internal stakeholders to deliver high-quality, business-critical software solutions.

RUNE INTELIGENCIA FARMACEUTICA - Spain, Valencia

Full-stack Developer

[01/05/2021 - 01/04/2022]

Designed and deployed mission-critical web applications for the healthcare sector, overseeing the end-to-end lifecycle from requirements gathering to production release.

Improved user experience (UX) for internal platforms, balancing complex backend functionality with clean, intuitive usability.

Itaca Sabien - Spain, Valencia

Android Developer

[01/01/2019 - 01/01/2020]

Designed and developed a native Android application for the *Hospital Universitari i Politècnic La Fe* in Valencia.

Actively participated across all development phases, from architecture and UI implementation to final testing and deployment
